Legislative Update

Florida Legislature

Bills taking affect July 1.

HB 275 — “Critical Infrastructure” Crimes

House Bill 275 aims to create new offenses under state law involving critical infrastructure. “Critical infrastructure” in the bill refers to linear assets that are designed to exclude unauthorized people, such as fences, no-trespassing signs, generators, energy plants, or TV stations.

Under this bill, damaging, accessing or tampering with critical infrastructure could result in both criminal and civil penalties.

HB 761 — Domestic Violence Protections

House Bill 761 amends the state statutes regarding domestic violence.

This bill will get rid of notary requirements for those seeking a petition for protection against domestic violence. Instead, these petitions would only need to be verified by the petitioner.

HB 775 — Surrendered Infants

House Bill 775 increases the age at which an infant may be surrendered.

Florida’s “Safe Haven Law” allows parents who are either unwilling or unable to care for their newborn infants — up to 7 days old — to surrender them at hospitals, fire stations and EMS stations.

However, HB 775 would up the age limit from 7 days old to 30 days old.

In addition, the law lets parents leave their infant with hospital medical staff after the child has been delivered. To do so, parents have to notify staff that they are voluntarily surrendering the child.

HB 775 also lets a parent call 911 and request to meet with an EMS provider so that the parent can surrender the infant.

HB 937 - Purple Alert

House Bill 937 updates the state’s Purple Alert statutes.

The new law will require local law enforcement agencies to develop their own policies to determine whether a Purple Alert should be activated.

When such an alert is issued, these agencies are also required to contact media outlets, inform all on-duty law enforcement officers and communicate the information to other law enforcement agencies within the county.

Legislative Update

Florida Legislature

HB 1473 — School Safety

House Bill 1473 seeks several changes aimed at bolstering school security in Florida.

The law requires that sheriff's offices responsible for certifying school guardians report the information to the Florida Department of Law Enforcement.

In turn, FDLE will have to keep a list of each person appointed as a school guardian, including their names, dates of certification and appointed schools.

Meanwhile, private schools will have to take on the costs involved in background screening and training for school guardians, though certification could waive those fees.

Additionally, the bill makes the following changes for school safety:

Exits/entrances must be secured when students are on campus.

Exits/entrances must be actively staffed when opened or unlocked (with some exceptions).

Each school district must develop a discipline policy for staff who violate school safety requirements.

People are prohibited from operating drones over a public or private school serving students in grades PreK - 12.

A grant program would be created through FDLE to give funds to law enforcement agencies to conduct security assessments for private schools.

HB 1555 — “Cyber Florida”

House Bill 1555 amends the state statutes for cybersecurity.

The bill renames the Florida Center for Cybersecurity — which provides education and research to bolster the cybersecurity sector in Florida — as “Cyber Florida.”

In addition, the bill redefines the center's mission: to “conduct, fund, and facilitate research and applied science that leads to the creation of new technologies and software packages that have military and homeland defense purposes or for sale or use in the private sector.”

Alongside that, the bill allows — but does not require — Cyber Florida to help state agencies with cybersecurity training and improving cybersecurity for government tech infrastructure, including within public schools.

SB 1680 — Advanced Technology

Senate Bill 1680 establishes the Government Technology Modernization Council.

This council is set to advise the state Legislature on new technologies, A.I. and other related issues.

The law also creates new rules about “generated child pornography,” which makes it a crime to own or purposefully view generated child pornography.

Those convicted of violating this new statute face up to five years in prison and a \$5,000 fine.
